Introduction

The Task Manager application is designed to help users efficiently manage their tasks. This manual provides an overview of the application's features, how to use them, and troubleshooting tips.

Installation

1. Download the application from GitHub.
2. Extract the files to your desired location.
3. Double-click the TaskManager.exe file to launch the application.

User Interface Overview

- **Home Page:** Displays a summary of task lists.
- **Task List View:** Shows tasks under each list, with options to filter and sort.
- **Task Detail View:** Allows users to view and edit task details.

Basic Operations

Create a new list

1. On the Home Page, click "Add New List."
2. Enter a name for the list and click "Save."

Add a new task

1. Select a list from the Task List View.
2. Click "Add Task."
3. Fill in the task details and click "Save."

Edit a task

1. Select a task from the Task List View.
2. Click "Edit."
3. Update the details and click "Save."

Remove a task

1. Select a task.
2. Click "Remove" and confirm the deletion.

Troubleshooting

Application Crashes: Ensure you have the latest version of .NET Framework installed. If issues persist, reinstall the application.

Tasks Not Updating: Make sure to save changes after editing tasks.
